Core Build-up
Material

CORE-FLO™ DC

Your Restoration is Only as Strong as its Core Foundation

CORE-FLO DC is the perfect choice for a core build-up and dentin replacement material.

- » High strength and low water sorption assures a strong foundation for crowns and direct restorations
- » Non-slumping material allows for predictable placement and a simplified core build-up
- » Low shrinkage properties allow it to be used effectively as a dentin replacement material
- » Void-free flow is ideal for post cementation
